GUIDE 01 · HOW MEFIT WORKS

STAR SETS & RIR

How to log the sets that count – and how your next target is set.

WHAT'S A STAR SET? ★

Every exercise has one marked ★. It's your main working set – the one that sets next week's target. Log it honestly: weight, reps and RIR.

RIR = REPS IN RESERVE

When you finish the set, ask: **how many more could I have done with good form?** That number is your RIR. RIR 2 means you stopped with two good reps left in the tank.

THE RIR SCALE

0 – couldn't do another rep · **1** – maybe one more · **2** – two more, solid · **3** – comfortable · **4+** – too light, go up next time.

HOW YOU PROGRESS

Hit the **top of the rep range on every set at your target RIR**? Next time add the smallest weight jump. Below the range? Stay at that weight and build the reps. Simple, steady, no guessing.

NEW TO RIR?

Beginners log weight and reps only for the first two weeks. From week 3 we add RIR – you'll get the feel for it fast.
