GUIDE 03 · HOW MEFIT WORKS

LOGGING LIKE A PRO

Good logs = better targets, faster progress and more XP.

LOG WHAT YOU ACTUALLY DID

Don't accept the pre-filled numbers if they're not what you lifted. Every set you change is a set your coach can use.

WEIGHT BOX VS REPS BOX

Weight goes in the weight box, reps in the reps box. 12 kg for 10 reps is **12 | 10** – not 1210 or 10 | 12.

DUMBBELLS ARE PER HAND

Log the weight of **one** dumbbell. Two 10 kg dumbbells = 10 kg.

ASSISTED MACHINES

On the assisted pull-up or dip, the number is the **help**. Lower = harder = progress.

SWAPPED AN EXERCISE?

No problem – log the swap and add a quick note so we know what you did.

WHY IT MATTERS

Honest, complete logs mean your next target is spot on – and you can see your progress climb week by week.
